## Product Safety Declaration – Multiboard Barrier

---

- We declare that our board grades made from 100% recovered fibres and coated with all types of polyethylene, including clear and pigmented are suitable for food packaging.

PE-coated:

Multiboard Offset  
Multiboard Kraft  
Multiboard Ecofrost  
Multiboard Ekokraft

- Multiboard Barrier may be used for the packaging of frozen food and may stand in direct contact with aqueous and fatty foodstuffs with their coated side. This applies within the temperature range – 40°C up to + 45°C.
- The carton board is manufactured in accordance with good manufacturing practice.
- Under foreseeable conditions of use, it may not transfer its constituent to food, with which it is in contact, in quantities which could endanger human health or bring about a deterioration in organoleptic properties.
- The board, all added chemicals and the polyethylene meets all demands as regulated by

Regulation EU No. 1935/2004 Article 3

Regulation EU No. 2023/2006 - GMP

The German Recommendation BfR No. XXXVI

Regulation EU No. 10/2011
